

## SPECIAL DELIVERY!

AP Pavers is extremely excited to of welcomed a new member of the team - a brand new Vögele 1800-3i. This tracked paver is superior to all others in its class; being equipped with the AB500 TP2 Compaction system this machine is capable of laying all CBM, RCC and HBM materials with an excellent performance.

This paver is now paving the way in Scotland, having left for its first ever job the very next day after we took delivery. We expect the Vögele 1800-3i to be in high demand due to its specialism in concrete paving - there really is nothing like it.

## NEW W120 CFi AND VIDEO!

It has been a very busy month for AP Pavers. We are excited to announce that we have also taken delivery of a brand new W120 CFi planer this morning. What is so exciting about this particular planer, is not only is it the best compact milling machine in its class, but AP Pavers are having this paver specially wrapped (in a top secret design!) for display at Hillhead show before it begins its working life.

We are proud and excited to continue our ever strengthening partnership with Wirtgen, and can hardly wait to show everyone the eye-catching design in the very near future - watch this space!

The new W120 CFi is due to be wrapped in the next week with a special design we have been working hard on. We will be filming this process and then editing it into a short time-lapse video to show the time and effort involved in creating such a work of art!

## HILLHEAD EXHIBITION 2016

We look forward to welcoming lots of people to view the unveiling of our new W120 CFi's makeover at Hillhead 2016. Our planer will be exhibiting on the Wirtgen stand - number Q1. While there please take a moment to look at the fantastic products for service that Wirtgen provide, along with admiring the creative design on our planer - we're sure you won't be able to miss this one!
