

## MORE VÖGELE 1800-3i's FOR AP PAVERS

Due to an increase in demand, AP Pavers have ordered yet another new VÖGELE 1800-3i to join the fleet. These tracked pavers have become highly popular with our existing clients so we are pleased to be able to offer more to the market.

The tracked version is highly superior to the wheeled version, not only are the rubber tracks now much more durable but they also provide maximum tractive effort in difficult places.

Manoeuvrability is fantastic on the 1800-3i, so don't be put off by it being larger than other models! Electronically controlled separate drives have been installed in the sprockets of the crawler tracks - allowing for perfect straight movement as well as exceptionally precise steering.

We will be taking delivery in the next 4-5 weeks, so be fast if you are looking to hire a big tracked paver!

## ROLLER DEMAND STRONG

Following on from our one of our previous issues where we announced that AP had taken delivery of several Hamm rollers; we are pleased to report that they are proving to be extremely popular.

Highly manoeuvrable, the HD 10 VV offers big-time compactive effort in a small package, equally at home for commercial or roadbuilding applications making it very desirable to the market.

Due to such great feedback, we have invested in yet another roller to join our fleet. Similar to the 10 VV, the 14 VV has all the same attributes in a slightly larger version - we are sure it will be just as popular!

## BUSY BOBCATS

As ever, our the Bobcat T590's are doing increasingly well.

Due to the versatility of these machines, they are proving to be an exceptional choice when it comes to looking for something not only small and manoeuvrable but also powerful the BOBCAT T590 ticks every box.

When it comes to choosing a compact tracked loader, look no further than AP. We can supply and equip our Bobcats with whatever attachments are needed to complete the job.

## NEW ONLINE DATA BOOK

Keep an eye out for the release of our new paver data book, which will be arriving imminently. AP are very excited to be able to provide this PDF to the market; and we are sure that with all the facts and figures included on each machine, people will find this book a fantastic insight into choosing just what machine to hire.
